## HP gives EE labs a lift

by Dawn Yoshitake  
Staff Writer

Cal Poly will receive a \$500,000 equipment donation over the next three years from an international engineering firm. Hewlett Packard of Palo Alto will donate equipment to be used in the Engineering, Computer Science and Statistics departments.

"This is among the largest donations we have received and certainly the largest from Hewlett Packard," said William Horton, dean of the Engineering and Technology Department.

"Seventy-five percent of our equipment is over twenty years old. We have over 4,000 items that probably had a book value of over \$1 million when they were originally purchased. With the money from the state budget, it would take 90 years to replace the equipment. Industry replaces its equipment on a five year cycle," Harris said.

Electronic and Electrical Engineering department head Dr. James Harris said a list of needed equipment will be taken from each of the department's 13 laboratories. Then a priorities list will be made.

For this year's request, the department has submitted a list for the Digital and Communications laboratory.

Dr. Paul Stoft, director of technology strategy and analysis at Hewlett Packard said Cal Poly may not receive the equipment for another two months.

Hewlett Packard has received the equipment list from Cal Poly, and the company is reviewing the list, Stoft said. A letter will then be sent to Cal Poly to verify the request.

Mustang Daily — Kent Clemenco

Jim Willse, managing editor of the *San Francisco Examiner*, addresses a Cal Poly reporting class on his two-day visit to campus as part of the Editor-in-Residence program sponsored by The Dow Jones Newspaper Fund and the American Society of Newspaper Editors.

## Support group for women formed on campus

A support group for women who have been molested by a family member has been formed at the campus Counseling Center.

The group meets Wednesdays from 2 to 4 p.m. in Jespersen Hall.

Dr. Elie Axelroth said that incest is something people would like to ignore, but unfortunately it is a problem that is growing throughout the United States. And San Luis Obispo County is no exception.

She explained that in a 1975 nationwide study of 412 university freshmen and sophomores 17 percent reported that as children they had undergone intimate physical contact with a family member.

"This study means that of the 16,000 students at Cal Poly, approximately 2,720 are survivors of incest," Axelroth said.

Axelroth hopes that any Cal Poly woman who believes she needs help will become involved with the counseling group. "We've

kept the group exclusively female in order to encourage openness," Axelroth maintained. "I can understand how it might be difficult for some women to express their feelings if men were in the group."

"So far, the counseling group has been working really well," Axelroth stated. "I feel that a support group is the best type of counseling for this issue because of the isolation that women commonly feel."

Axelroth explained that the stigma attached to incest makes it difficult for many women to join a counseling group. "But this is exactly what they need to do, if they ever expect to deal with the past and be able to handle the future," she added.

"Women who have endured incest often feel guilty, depressed, show self-defeating patterns, suffer from low esteem and commonly are confused about the differences between caring and sex."

"The myths that our society holds about incest does not make it any easier for the victims of incest, said Axelroth.

"Our society likes to believe that incest doesn't occur, and when we do believe that it does, we like to think that it only occurs in the lower socio-economic sectors of society," Axelroth explained. "But perhaps the biggest myth we hold is that children will expose their parents if they are being sexually abused — myths are false."

## Senior project provides sign for Poly campus entrance

by Leanne Alberta  
Staff Writer

The corner of Grand Avenue and Slack Street is currently undergoing a face lift, thanks to two Cal Poly Construction majors.

The new landmark is the senior project of Dave Boyle and Brian McCosker, and when completed, will resemble the Cal Poly "sign" that marks the Highland Drive campus entrance.

"For our senior project, we wanted to leave behind something for the school," Boyle explained. "We decided to construct a new sign, and in order to preserve uniformity, we chose the same design as the one on Highland Drive."

Boyle and McCosker began working on their project two weeks after spring quarter break, and hope to finish in time

for Poly Royal.

Even though the sign is currently in its basic-frame stage, Boyle and McCosker hope to pour the exterior concrete walls by April 19. They estimate that by the time the project is completed, they will have invested a total of 200 man-hours in construction, a figure which excludes the immense amount of time spent on paperwork.

"The project should cost between \$4,500-\$5,000 when completed," said David Pierce, head of the Construction Department and senior project advisor for the two. "It is totally funded through grants and various donations. No university funding is involved."

Over the last two years an anonymous donor has provided a \$32,000 grant through Crocker National Bank. The grant was given to the construction

department primarily for use on the Highland Drive and Grand Avenue signs, but the donor made no stipulation for the utilization of the excess funds.

Since the bank and the donor placed no contingencies on the use of the grant, the construction department has purchased eight IBM computers with the excess money. These micro-computers are used extensively by the construction faculty for class preparation and by students when they must deal with mathematical problems commonly found in construction projects.

"If you want other learning facilities in your classroom besides desk and chalkboards, you have to find donors and grants because the state simply won't allocate the money," Pierce explained. "I want construction students to realize that computers are tools that

will enable them to get a job done faster and more efficiently."

According to Boyle and McCosker however, the tool that enables them to get their project done faster and more efficiently, is the fact that they are working together. "There's no way that you can work alone on a project like this," McCosker said.

This is not the first time the two have worked together, nor will it be the last. Boyle and McCosker have built several houses together throughout the county and after graduation this quarter, they will both be employed by the Bay Area-based Independent Construction Company.

"I feel that this senior project has more usefulness than a paper that is written and then gets trashed," McCosker explained.

## Off to a bad start

All government officials spend a great deal of time and effort establishing a relationship with the mass media. Sometimes the relationship is good and other times the relationship is bad.

Possible ways of damaging relations with the mass media is to either place undo blame upon the media for government's shortcomings or to try and manipulate the media into doing government's bidding without question.

Kevin Creighton, newly elected president of the student body, has a great deal to learn about the relationship between the student media and the student government on this campus.

On the eve of his victory in the recent student elections Creighton was sought out by both the *Mustang Daily* and KCPR radio for interviews. Creighton placed the blame for the lowest voter turnout in the university's history on a *Mustang Daily* editorial which had questioned the importance of most of the issues on the ballot.

And when approached for a KCPR interview Creighton demanded the station first broadcast election results before speaking to him and getting his statement. The station complied with his wishes by broadcasting the presidential race results. The disc jockey decided to celebrate Creighton's manipulative actions with a song titled "Mongoloid."

Creighton's reaction was a phone call to the station's manager threatening to cut funding for the station. The station manager's reaction was to run an editorial on the air criticizing Creighton's comments.

Granted, at times the relationship has dropped to levels that the media and government barely tolerated each another but there is no reason better relations should not be pursued.

This type of behavior by both the student media and the student government will do nothing but further decay any semblance of a communication relationship that may exist.

There always has been and always will be the separate opinions that claim the government is ineffective while the other

opinion will claim that the media is not supportive of government's actions. This relationship is healthy up to a certain point. When the relationship is too close or too distant it becomes unhealthy.

We are not condoning Creighton's behavior, rather we condemn it, nor are we saying that the media reacted in the best way possible, but Creighton brought it upon himself.

Let us all hope for better relations in the future since the only people truly harmed by these actions are the collective student body.

## Last Word

### Many explanations possible for Earth's formation

Why didn't anyone tell me that the theory of evolution is only a theory? All the way through public school I was presented with the facts of evolution, and no one told me that the theory linking the facts had not been proven.

When I was younger I would go to church and hear that God created the world in seven days, forming man from the dust of the ground. Then I'd go to school and hear that man descended from monkeys. When I was in grade school the two theories of man's origin never seemed to contradict.

But as I grew older, I realized that the two theories could not coexist. Of course, I wanted to believe the theory of evolution, because the world of science seemed so fascinating and so right to my young mind. But I also gained a strong faith in the Bible — the whole Bible, not just the parts I wanted to believe.

So there it was, my faith in the Word of God versus my faith in scientific truth: creation versus evolution. I was scared of the debate going on in my mind

because I thought one of my beliefs, either in science or in God, would have to go.

Then I heard a geologist named John Weister explain how he had dealt with the same controversy. He looked at the facts, the scientific facts of evolution, and compared them with the Biblical account of the creation and development of our world. He discovered that it's not a question of creation versus evolution, but a creator versus no-creator, creator versus random chance.

I read Weister's book, "The Genesis Connection," and learned that while the theory of evolution is one way of piecing the facts together, it is only one way. There is at least one other explanation, the Biblical explanation, of the relationships between fossils, the geological record and other scientific facts about how our world has developed.

As Weister said, it may take as much faith to believe in the theory of evolution as it does to believe in the theory of creation; neither has been proven or disproven scientifically.

So I don't have to throw out one of my beliefs. I can believe in science, as it discovers the facts about our world, and I can believe in Christianity, as we discover the creator of our world.

The other day I heard someone on a radio newscast say the theory of evolution should be taught as theory, not fact, in public schools. Students have a right to know the truth, including the truth that the evolutionary theory is a scientific opinion, not a scientific fact. Let their teachers present them with the scientific theory of our world's development, but let the students decide whether to believe the theory as truth.

Only then can schools be fulfilling their function of teaching science without intruding into the students' right of conscience, the students' right to intelligently decide their own beliefs. After all, isn't scientific study supposed to be an objective means of discovering our world?

## Windsurfers: the 'new wavers' of the Central Coast

by Michael Stump  
Staff Writer

The place is Lopez Lake. It's a warm, windy, spring day. The lake is being utilized fully; sailboards, or windsurfers as they are commonly called, are the dominant element across the lake.

"It's too bad there was no wind at Jalama," said a well-tanned windsurfer, wearing half a wetsuit, and supporting a camera with a 400mm zoom lens.

"Yeah, but this place is kind of nice," his buddy retorted.

Just then another friend came strolling in, windsurfer in hand, he then tore off his wetsuit and plopped down on the grassy beach.

"That's Guy," one of them said. "He's pretty good."

They were referring to Guy Lindburg, the winner of the first annual California Surf-Sailors tour and probably one of the top three windsurfers in the nation. Prizes at this stage are not too high. Lindburg won airfare to the Maui Grand Prix, a professional race coming up in October.

"I see windsurfing getting as big as skiing," said Lindburg, referring to the prize money.

Lindburg has been windsurfing about 21 years and has sailed and surfed in the past. He said that windsurfing beats them all.

"With windsurfing you're moving way quicker and you catch twice as many waves," said Lindburg.

Windsurfing began 13 years ago over an argument between a surfer and a sailor about whose sport was superior. The result was a compromise.

For anyone interested in trying the sport, there are a number of ways of going about it.

The Cal Poly Sailing Club has one board for the use of the club members. To be in the club a \$15 per quarter fee is required.

There are a couple of stores in the San Luis Obispo area that sell or rent windsurfers and some that give instruction. Good Clean Fun Surf and Sport in Cayucos, JG Custom Surfboards, and Mountain Air Sports all rent and sell windsurfers.

Mountain Air Sports has an introductory lesson, which includes land and water practice. "A simulator is used to give you the feel of the sail without worrying about falling in," said Betty Lundberg, an employee of Mountain Air Sports.

Some shops will not rent a windsurfer unless the rider is certified said Lundberg. It takes 6-8 hours of instruction to be certified.

As for renting, it will be about \$30-50 depending on the type of board. It will cost about \$600 to buy a beginner board. "This is a good board that will take the windsurfer up to advanced intermediate range," said Jill Wells, office manager of Mountain Air.

Rough surf and a lack of wind force this surfer to walk his board into the shore at Pismo Beach.

## Boardsailing contest is not a breeze for festival surfers

Story by Cindy Blankenburg

Wind is the key ingredient to boardsailing. So it was the lack of wind that caused problems for several Cal Poly students and alumni as well as community members when they competed in the first Festival of Winds boardsailing contest Saturday.

The fifteen sailors raced a 6.5-mile course from Port San Luis Beach to Pismo Beach with very little wind, making it hard for the competitors to maneuver.

Cal Poly Construction major Bill Maudru placed first in the men's heavyweight division. His time for the event was 2 hours 28 minutes and 41 seconds.

The first man to reach the destination was Steve Lady. He finished in 2 hours 17 minutes and 24 seconds. With ideal conditions, it is possible that he could have finished in about an hour.

Lady, who took first place in the men's lightweight division, said the key to his winning was that he watched the other sailors and watched where the wind was.

"I stayed offshore more than the others. I was also lucky," he said.

Coming in second in the men's lightweight division was Arroyo Grande High School student Erik Legreid. His time was 2 hours 19 minutes and 48 seconds.

Third place in that division was Tom McNeil, finishing in 2 hours 34 minutes and 58 seconds. Fourth went to Cal Poly student Bruce Donley, 3 hours 40 minutes and 34 seconds. Two competitors in this division didn't finish.

Placing behind Maudru in the heavyweight category was Ron Kemper, with 2 hours 30 minutes. Third went to Dave Hanst with a time of 2 hours 32 minutes and 32 seconds. Gordon Robb placed fourth with 2 hours 40 minutes and 10 seconds. Architecture Engineering major Brian Caserio placed fifth with a time of 2 hours 56 minutes and 11 seconds. Tom Oeschger placed sixth, 3 hours 47 minutes and 43 seconds.

Three women competed in the event, and two of them had never raced before. First place finisher Lauren Poe (2 hours 48 minutes and 54 seconds) said that the race became a balancing contest because of the lack of wind.

Second place finisher and Cal Poly alumni Ann Kemper clocked in with 2 hours 59 minutes and 19 seconds. She was followed by Carolyn Hansen with a time of 3 hours 5 minutes and 57 seconds.

None of the competitors said they saw any sharks, but they were accompanied by whales. One person said he thought they were rocks and when he sailed over them, one rock turned into a tail.

The winners received prizes donated by local merchants.

The Festival of Winds will conclude next weekend with a sailboat race following the same course on Saturday, April 21 at 10 a.m.; wind permitting.

The event was sponsored by the Pismo Beach Chamber of Commerce and the Five Cities Times-Press-Recorder.

# Men's tennis team captures CCAA championship

by Sherman Turnline  
Staff Writer

The Cal Poly men's tennis team made history last weekend by capturing the California Collegiate Athletic Association championship in competition at Cal State Bakersfield.

It was the first time in five years that the men netters have brought the championship to Cal Poly. In the past three years they have come close, only to place second. During those three years of finishing second in the CCAA, the Mustangs were ranked in the top 10 in Division II.

That says a lot about the CCAA, which is regarded as being the toughest conference in the nation. The league features three teams ranked in the top 20 in the nation and two in the top five. Chapman College and Cal Poly are in the top five with CS Northridge in the top 20.

In the first round the Mustangs had an easy win over Cal State Dominguez Hills, defeating the Toros 6-0. The doubles were discontinued after the singles. The win was Cal Poly's second shutout over CSDH this year.

Against Cal State Bakersfield, Poly continued its dominance in singles competition by eliminating the

host team 6-0. Once again, it was their second shutout of the season over Bakersfield.

The final game was against arch-rival Chapman College. Poly had lost to Chapman in the regular season, but coach Hugh Bream said his team had a positive attitude going into the match.

"The win last Monday over Cal State Hayward gave us the confidence that we lacked earlier in the season," said Bream.

With that confidence and motivation, the Mustangs defeated Chapman 5-3. The teams split in singles play 3-3, with four of the six matches going three sets. Captain Rob Pritzkow lead the way for the new CCAA champions by defeating Roger Alex of Sweden 6-7, 6-4, 6-1. Dave Reynoldson played well in ousting the No. 6 player in the West, Terry Davis, 7-5, 6-4. Freshman Mike Giusto defeated Paul Charlesworth 4-6, 6-3, 7-5. Giusto was trailing 5-3 in the third set before posting the win.

Poly played with consistency in doubles with Randy Havens and Pritzkow, No. 1 in the West, averaging an earlier lost to Chapman's John Hancock and Terry Davis, winning 7-5, 6-2. Thor Holt and Giusto teamed up to outlast their opponents 6-2, 7-6. The other doubles match was stopped when the entire match against Chapman was clinched. Coach Bream felt that the early lead in doubles matches seem to take the enthusiasm out of Chapman.

Within a week of tennis that saw Cal Poly beat two nationally ranked teams; Chapman College (No. 3) and Cal State Hayward (No. 4), Bream hopes the wins will put them higher in the rankings. At midseason the Mustangs were ranked No. 7.

Posting a 9-1 conference record, it is not surprising that the Mustangs have four players who were chosen All-CCAA. The players were Pritzkow with an overall record of 18-5 and 8-2 in league; and Giusto with an impressive overall record of 13-2 and 8-0 in league competition.

The Mustangs will conclude the regular season with 3 matches against Division I teams on their way to nationals.

Mustang Daily—Ken Dintzer

The Cal Poly men's tennis team came down hard on Chapman to win the CCAA tournament.

## Rec Sports Week

Today marks the start of National Recreational Sports Week, an event established to promote the awareness and benefits of Recreational Sports and fitness activities.

The week is sponsored by the National Intramural-Recreational Sports Association.

A 15 mile bicycle ride is planned for today, beginning at the Main Gym at 11 a.m. The ride will follow the Cuesta College loop.

For the aquatic-oriented, a Stroke Improvement clinic will be offered Wednesday at noon in the outdoor pool by Rec Sports lifeguards. Noon swim is scheduled daily in the outdoor pool.

Three activities are scheduled for Thursday, beginning at 8 a.m. with a lecture "Recipe for Fitness: Nutrition for Athletes." The lecture is sponsored by the Student Health Center and will be presented by Health Education staff members in the Health Center Conference room.

A "Recreational Sports Day" is scheduled from 11 a.m. to noon in the Union Plaza. Activities will include a tug-of-war, free throws, frisbee target shooting and a resource booth.

Recreational Sports Week winds down with a "Walk for Fitness." The walk will begin at the Main Gym at noon.

We're looking for

### ENTREPRENEURS

...just like us. Those wanting the full compensation due them now for their solid ideas; those not wanting to get stuck behind the baby boomers in a corporate ladder. Check out GLIMMER ENTERPRISES. We're interviewing on campus. Don't miss our orientation. A corporate career is no career at all.

# Baseball takes two from Pomona, now in second

by David Kraft  
Staff Writer

The Cal Poly baseball team may have been shellacked 18-4 Sunday by Cal State Fullerton, but the bus ride home was a short and happy one for the Mustangs.

That's because Cal Poly accomplished their mission to the Southland this weekend when they swept a doubleheader from conference rival Cal Poly Pomona on Saturday. A win Friday (when Poly lost 3-0) or Sunday against the Titans would have been icing on the cake.

As it was, Mustang head coach Steve McFarland could do without the extras.

"We went down there with one thing in mind," McFarland said, "and that was to sweep Pomona. And, that's what we did."

The scores over the Broncos were 6-5 and 12-6. The pair of big conference wins moves Cal Poly to within half a game of the top spot in the CCAA. Chapman leads the league at 10-3 after splitting with cellar-dwelling Cal State Los Angeles, while the Mustangs are 10-4.

The Mustangs and Panthers square off in a crucial five game series next week, including a three game set during Poly Royal at San Luis Obispo Stadium, but McFarland is cautioning his club not to look too far down the road to the Chapman series. He knows Poly

will have its hands full with today's opponent, Cal State Dominguez Hills.

"Dominguez Hills is not a bad ball club," McFarland said. "They play really good defense and have good pitching. They're a young club, but we can't afford to take anybody lightly, especially at this time of the year."

Today's conference twinbill gets underway at noon in San Luis Obispo Stadium. It marks the first time the Mustangs have played at home in three weeks.

McFarland said Mike Braire will start one game of today's doubleheader, but he hasn't decided on a second starter. Greg Gilbert is still not recovered from an ankle injury, while Steve Snyder and Mike Cook both threw Saturday.

"We'll have to piece it together as a staff," McFarland said.

The pitching staff isn't the only thin spot for Cal Poly. Mustang first baseman Jason Maas, hitting over .400, including five hits against Pomona on Saturday, injured his shoulder diving into a base in the second game. He didn't play Sunday and McFarland won't know until game time today if he will be ready.

The Gilbert situation also continues to plague the first year coach. McFarland said he doesn't know when Gilbert, his top starter, who suffered an ankle injury playing basketball, will be able to answer the bell.

"The way he was walking on it yesterday (Sunday), I don't think he'll be ready to throw tomorrow and may not be ready Friday (when Poly travels to Carson to take on Dominguez Hills for three games)."

Snyder won the opener against Pomona. He pitched well in striking out six while walking just one.

His teammates contributed nine hits, with four players getting a pair of safety's each. Maas had two doubles and knocked in three runs for most of the offensive firepower.

In game two, Pomona scored two runs in the bottom of the sixth to knot the score at six, but the Mustangs exploded for six runs to cruise in for the 12-6 victory.

Rob Lambert opened the seventh with a single, and he scored on Kent Bachman's triple. On the day, Bachman had a single, triple, home run and four runs batted in. Pat Espisito then followed with a sacrifice fly to give Poly an 8-6 cushion.

Mark Gamberdella followed with a single, and Jeff Estabrook doubled. Rich Nelson, who had four hits in game two, then doubled in two and Alray Grossi doubled in Nelson. Monty Waltz, who hit a three run homer earlier, singled in Waltz to close the scoring.

Carl Hjerpe got the win in relief of Cook. Hjerpe came in with the bases loaded in the sixth and walked in the tie breaking run before retiring Pomona, but got the Broncos out easily in the seventh.

## Classified

Student, faculty & staff daily rates are \$2.00 for the first 3 lines, and 50¢ for each additional line. Campus Clubs and Greekness and Personals are half price. Advertising for 4 or more days cuts the price in half for all categories.

Payable by check only to Mustang Daily. Non-Campus & Business rates are slightly higher. Ads must be submitted before Noon at the UU information desk or in GA226 to begin 2 working days later.
